### Discover The Imago Platform® Advantage

**CONSISTENT &** 

**EFFICIENT DELIVERY** 

Your information always remains under your control. Imago never **TOTAL DATA SECURITY** shares data with public Al models or third parties, and strict safeguards prevent unauthorized access, even from internal sources. The Imago Platform® mirrors your company's existing data governance **POLICY-BASED ACCESS** structure, applying the same view, edit, and distribution permissions across every workspace. **STRUCTURED &** Both conversational language and precise data such as **UNSTRUCTURED DATA** measurements, prices, or dates are managed seamlessly within a single unified interface. **SUPPORT** Proposal creation, resource planning, and production tracking come **STREAMLINED** together in one workspace, reducing manual effort and accelerating **OPERATIONS** progress from concept to delivery.

high standard of quality.

Automated scheduling and reporting keep production on track,

maintain output accuracy, and ensure every project meets the same

#### **Manufacturing Workflow Optimization**

Imago Platform®

## PROCUREMENT & MATERIAL PLANNING

Accepted quotations trigger
automated procurement
workflows within Imago. The
platform connects with ERP and
supplier systems to forecast
material demand, verify
availability, and align resources
and components with production
schedules and supplier lead
times

### INVOICING & PAYMENT

Imago compiles production records, delivery confirmations, and invoices into a full financial report within seconds. Reports are reviewed before client issue, ensuring accuracy, transparency, and faster billing - all within one platform.

1

# LEAD GENERATION & QUALIFICATION

Imago searches your CRM and industry databases, enriching data with verified contacts from Eniro, LinkedIn and sector specific platforms. Every lead becomes complete, accurate, and ready for engagement.

## PROPOSAL & QUOTATION

Imago analyzes your CRM for comparable projects and merges data from past quotes, component specifications, and production requirements. It automatically generates accurate pricing and delivery timelines while compiling supporting technical information – ensuring consistent proposals every time.

### PRODUCTION & MANUFACTURING

Imago connects with production and quality systems to capture line data, testing results, and traceability records. Its Al agent delivers real-time insights, helping teams monitor progress and maintain consistent quality and delivery performance.

Support teams use Imago to access client data instantly.
Combined insights from CRM, projects, and web sources enable quick, informed responses.
